

Roger C. Viadero, Jr. – Senior Consultant, Environmental Scientist

Introduction

I'm a Professor and Chair of Western Illinois University's interdisciplinary Ph.D. program in Environmental Science and Director of the University's Institute for Environmental Studies (IES). My work bridges the gap between environmental engineering and environmental science/ecology. For more than 24 years, I've designed, conducted, and led large-scale environmental assessments that involve stakeholders from a variety of academic, regulatory, and nongovernmental organizations.

I hold a Ph.D. in Civil and Environmental Engineering and am a Board-Certified Environmental Engineering Member (BCEEM) of the American Academy of Environmental Engineers and Scientists (AAEES) with a specialization in hazardous waste management and site remediation. I'm also an Ecological Society of America Certified Senior Ecologist (CSE).

Relevant Experiences

Some of my other complementary experiences include service as:

President of the AQUACULTURAL ENGINEERING SOCIETY (AES).

A member of the editorial board of the JOURNAL OF AQUACULTURAL ENGINEERING.

Panel manager for the U.S. Department of Agriculture's Aquaculture Small Business Innovation Research (SBIR) Program through the National Institute for Food and Agriculture (NIFA).

An expert witness in state and federal courts.

A Senior Fellow at George Washington University's Homeland Security Policy Institute.

Education

B.S., Physics, Mary Washington College

M.S., Nuclear Engineering, University of Illinois

Ph.D., Civil and Environmental Engineering, West Virginia University

Professional Licenses/Certifications

Board Certified Environmental Engineering Member (BCEEM)

Certified Senior Ecologist (CSE)
