LA CROSSE, Wis., June 17, 2022 — The Bi-State (WI & MN) region north of Locks and Dam 10, south of Prairie du Chien, benefits from the recently released U.S. Army Corps of Engineers FY 2022 Omnibus Bill Work Plan. This region includes the 11 counties of the Northern Grain Belt (NGB) Port Statistical Area (PSA) and the 7 riverfront counties of the Minneapolis-Saint Paul Metropolitan Council. The **\$112M** funding for this region included:

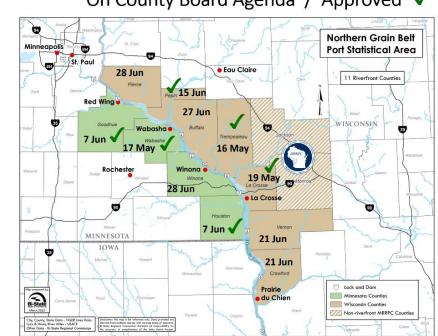

- Operations and Maintenance (\$109M)
- Construct Small Scale Ecosystem in Pool 2 (NESP) (\$500K)
- Upper Mississippi River Restoration (TBD)
- St. Paul Small Boat Harbor Dredging (\$500K)
- Locks and Dams 5 & 10 Rehabilitation Work Plans and Specifications (\$2M)

The following projects received more in the U.S. Army Corps of Engineers Work Plan than what was in the 2022 budget:

- Operations and Maintenance (\$1.8M)
- Locks and Dams 5 & 10 Rehabilitation Work Plans and Specifications (\$2M)

The U.S. Army Corps of Engineers Work Plan was released on May 25, 2022, and can be found at:

- <u>Construction FY2022 work plan</u>
- Investigations FY2022 work plan
- Operations and Maintenance FY2022 work plan

This is the very first time since authorized by Congress in 2007 that Navigation and Ecosystem Sustainability Program (NESP) construction was funded in an annual appropriations bill (Construct Small Scale Ecosystem in Pool 2 [\$500K]). "The value of waterborne commerce to the region and the global supply chain is demonstrated by the 13,039,841 tons or approximately 8,400 barges of commodities shipped to and from our ports and terminals that transited through Locks and Dam 10 in 2021." As reported by the U.S. Army Corps of Engineers, St. Paul District." said Bob Gollnik, Senior Planner, Mississippi River Regional Planning Commission (MRRPC).

One more county (Pepin) approved a resolution this week supporting the MRRPC application to form the NGB PSA. See map to the left.

As of 17 Jun 2022 On County Board Agenda / Approved 🗸

Northern Grain Belt Ports See Increased Federal Investment

Bottom Line: The only Principal U.S. Inland Port on Upper Mississippi (Marine Highway 35) north of Locks and Dam 10 is the St. Paul Port Authority, MN. The impact is that not all tonnage reported in Minnesota and Wisconsin is attributed to a federally recognized port. That oversight under-represents the economic value (value of waterborne commerce) to the nation and the world generated by the bi-state area (Wisconsin and Minnesota) above Locks and Dam 10 on the Mississippi River (see bi-state photo centered on La Crosse, WI). It misrepresents the national supply chain. That oversight also reduces opportunities for direct and indirect investment into the region's multi-modal transportation infrastructure and natural infrastructure.

In 2022, the Northern Grain Belt (NGB) Port Statistical Area (PSA) recognition will be applied for by a non-federal sponsor. See below map. Once established, it is anticipated to be a top 100 inland port (based on tonnage handled). This federal recognition of the NGB PSA will better represent the economic value (and the value of waterborne commerce) generated by the bi-state region.

Background: Ports on the very long, narrow segments of the maritime highway system serviced by locks and dams are by their very geographic nature, extended, linear, multi-modal

transportation features that are generally around 200 miles in length. They have efficiently dispersed terminals along the waterway close to where grain is grown, and agricultural products are produced. Terminals on the waterways are served by an interconnected network of roads and railways, and compliment nearby industrial and commercial users of the region's multi-modal transportation infrastructure supporting other commodities. The NGB PSA has 34 terminals throughout its region.

Comparable linear ports in the **Upper Mississippi River** Tri-State area (IL, IA, MO) are the Mid-America Port Commission (MAPC) (328.8 River Miles; IL Waterway Ports (175 River Miles); Upper Mississippi River Ports of Iowa and Illinois (221 River Miles). Comparable linear ports in the **Ohio River Basin** are the Ohio River's Ports of Cincinnati and Northern Kentucky (226.5 River Miles); the Port of Pittsburgh (200 River Miles); and the Port of Huntington, West Virginia (199 River miles).

Concept: An application will be submitted for approval to the U.S. Waterborne Commerce Statistical Center by the non-federal sponsor. It will include all 11 county resolutions agreeing to be part of the NGB PSA. This agreement is cooperative and does not preclude or prevent other county economic development / transportation arrangements and agreements. Additionally, the NBG PSA has no taxing or bonding authority.

Benefits: The NGB PSA will: 1) Statistically represent the region as a federally recognized multi-modal port; 2) Inform regional multi-modal transportation planning efforts; 3) Support regional marketing and economic development efforts; 4) Raise the area's profile to improve regional, national and global visibility and competitiveness; 5) Give a competitive edge to attract a wide range of public and private investment; 6) Create a regional multi-modal transportation infrastructure identity; 7) Support sustainability planning efforts; and, 8) Serve the bi-state area and all communities (disadvantaged and economically distressed) as an economic development tool within the region.
